SQLSERVER: Ricreare i DEFAULT di uno schema

Indice dei Contenuti [Nascondi/Mostra]

Eseguendo questo script su un database sqlserver vengono mostrate due colonne con gli statement di drop e di create dei default

```
1   SELECT                                                                                          ?
2     DefCons.name AS ConstraintName,
3     schema_name(Tab.schema_id) AS SchemaName,
4     OBJECT_NAME(DefCons.parent_object_id) AS TableName,
5     Col.name AS ColumnName,
6     DefCons.definition AS ConstraintValue,
7     'ALTER TABLE [' + schema_name(Tab.schema_id) + '].[' + OBJECT_NAME(DefCons.parent_object_id) +
8     'ALTER TABLE [' + schema_name(Tab.schema_id) + '].[' + OBJECT_NAME(DefCons.parent_object_id) +
9   FROM
10    sys.default_constraints AS DefCons
11  INNER JOIN
12    sys.columns AS Col
13  ON
14    DefCons.parent_object_id = Col.object_id AND DefCons.parent_column_id = Col.column_id
15  INNER JOIN
16    sys.tables Tab
17  ON
18    Tab.object_id=Col.object_id
```
